

Full Moon of Leo, fifth Full Moon of this Astrological Year, on Saturday, August 9, 2025, at 09:55:03 in Romania:

The main Keynote or phrase to consider for all Leo Full Moons (each year): **“I am That and That am I.”** The Leo Full Moon Keynote of Light each year is: **“The Light of the Soul.”** **“(Hint 1: A reflected point of light logoic, or divine. Hint 2: The light diffused in Cancer focuses and reveals eventually a point.)”** Consider the Keynotes at, or as close to, the time of the Full Moon as possible and what it might mean as a Group. Each of the constellations also have at least one, but also as many as five, Ray determining energies by which they rule and of which they rule. **The main Ray energy of Leo is considered to be Ray 2.** So, Leo is considered to have main energies of Love Wisdom or what is considered as Understanding. In other ways, A.A.B. writes in DINAI, page 109, “this ray is preeminently the teaching ray, the ray that is sometimes called that of “light-giving influence” or the “ray of the illuminator.” “The task of all true educators is to bring light to the minds of those they instruct, so that they may walk more securely in the way which leads to the goal for any particular incarnation.” It is a recommendation to consider the Leo Keynotes as Ray 2 Keynotes. This is a direct correspondence to the information of our Color Consultations and the way this same Ray determining affects us individually and in our relationship to our group. So, our Color Consultation information can be reviewed and related to each of the Full Moon determining energies to determine the possible effects and opportunities each Full Moon offers each of us personally and in relationship with the group. This was explained and expanded upon from Esoteric Astrology (EA) in general in Addendum 1 from the past Aries Full Moon report (from April 2021 – please let us know if you would like that resent to you).

This year we are adding information and specific examples of how each Ray can and does effect the different parts of our being and our roles in a Monadic Manifestation Group, **however for this month of the Leo Full Moon we will be showing the 10 stage hierarchical progressions of the present crystal set and how that relates to the color consultations and our determining rays as Addendum 1 below.** We will be taking one example of a different individual's ray structures per month (**NOT including this month**) from the books, “Discipleship in the new age I & II” by Alice a. Bailey. Then we will add the corresponding colors and interpretations from a SAM2013 Synthesis color consultation/interpretation to the example. This will hopefully help each person see possible ways in which their color readings and hypothetically interpreted Rays may be affecting themselves and their relationships in groups. This will also hopefully help prepare for our work with the new set of Synthesis (Higher SAM Soma Aura Monad) color products being developed by Virginia at Favisan for us. And finally for now this will also hopefully help prepare for our work with the future 'Mergration' (Lower SAM Sycal Astral Mental) color products. Then there will be a complete set of SAM2013 Synthesis And Mergration color products which help show how the 'Mergration' of the Sycal Astral Mental bodies/vehicles/consciousnesses into the Soma or Personality then Synthesizes with the Aura and Monad. Or in reverse the SAM2013 Synthesis And Mergration products would help show how the Synthesis of the Soma Aura Monad bodies/vehicles/consciousnesses then 'precipitates into', determines, influences, governs, or even differentiates, splits or divides into the Mental Astral Sycal bodies/vehicles/consciousnesses from the Soma. From the simple and colorful basis of SAM2013 Synthesis And Mergration color system our internal and external relationships and interactions in life can be viewed, analyzed, discussed, patterns seen, 'paths of least resistance', rhythms and cycles identified and defined, and much more in the realm of conscious understanding and communication. More can be found at our website at: <https://www.sam2013.org/colorschoo.html>. More on the Crystal Set hierarchical progressions and a high resolution graphic, can be found at: <http://www.sam2013.org/crystals.html>.

Leo is the fifth sign of the new Astrological year and the second of the nine 'grounding or anchoring energy and consciousness' Full Moons of the year. It helps to continue to manifest the new 'birthing' energy of the higher building cycle for the astrological year which happened during the past full moons of Aries, Taurus, and Gemini (April, May, and June) which is also called the Higher Interlude. Then Leo and the following seven different full moons of the year continue to ground or anchor and manifest these higher interlude energies and consciousness and are considered the Lower Interlude. Addendum 3 from the past Aries Full Moon report (from April 2023) is some additional information on the full moons and possible meditation forms (please let us know if you need that resent to you or it can be downloaded from the website at the bottom of the page at: www.sam2013.org/group_consciousness.html).

The Key to the Ray 2 Method is: **"Let all the life be drawn to the Center, and enter thus into the Heart of Love Divine. Then from that point of sentient Life, let the Soul realize the consciousness of God. Let the word go forth, reverberating through the silence: 'Naught is but Me!'"**

Please continue to keep in mind, from the Gemini Full Moon Report (May 2024), Addendum 2 which was two papers titled, "Vision Paper: Unfolding Work for 2024-2026" by 2025 Initiative (www.2025initiative.org) and "More details about this proposed experiment and our groups' ideas about the unfolding opportunities of the period of 2024-2026". The addendum started with a note from us as an introduction about the papers and can also be found on the website at the bottom of the page at: www.sam2013.org/group_consciousness.html.

A. Notes on this coming Full Moon of August/Leo:

- 1. Watch for any impressions** that may come to you before the Full Moon that may relate to the Ray 2 Keynotes and your specific Rays (from your Color Consultations), especially two days before the Full Moon, the day of the Full Moon and two days after the Full Moon. **If you want to share** any of your impressions with us please do. If you want any impressions shared with the group let us know and we will include them in the next month's meditation notes.
- 2. This is the fifth of twelve different Full Moons of this Astrological year** and is the second of the nine different full moons for grounding of 'Consciousness and Energy' full moons of this astrological year. The energy which is built and gathered during first three 'Building' Full Moons at the beginning of the astrological year, which is also called the 'higher interlude', will then be distributed over the last nine different Full Moons during the end of the astrological year, which is also called the 'lower interlude'.
- 3. Previous addendum 1 from the Full Moon report of Aries (April 2021) gives reference into more insight and inspiration for how to** view some of the expanded awareness of these monthly and yearly Full Moon cycles as we continue through this seventh Astrological Year of this group formation and the group's functioning.
- 4. Normally Addendum 1 below for this year relates to** information and specific individual examples of how each Ray can and does effect the different parts of our being and our roles in a Monadic Manifestation Group, however this month it is showing the hierarchical progressions of the Crystal set and how that relates to the Color Consultations.
- 5. The 2025-6 astrological year Annual Keynote is,** "LET THE GROUP EXPRESS THE QUALITY OF THE HIDDEN VISION:" Hint: "The hidden vision is not "man's vision of God" but "God's own vision of His purpose."

B. Notes and Activities on or since the last Full Moon July/Cancer:

- 1. SuonAngelMiriam meditated at the time of the full moon and new moon together with Safi (when she wanted). We had what we consider** very good meditations for the continued new Astrological year and of the grounding of consciousness cycle of the astrological year and of this year of Impact on the next 100 years. We are still having more experiences during the toning, chanting and vocalizing parts of the meditations and with the group exoteric, esoteric, and occult crystals and now also with some of the new hand held crystals this year.
- 2. All new crystals for this 2025 impulse year, that happens once every 100 years,** have been received and this culmination of the crystal grid as a blueprint for this group work has been anchored on this just past Summer Solstice Puja (see previous reports for more information and pictures of these crystals and the Puja).
- 3. Revised and renewed Hemp Museum suggestion** presented to Zoli, Virginia, and Leontina as a possible group project. There was similar input about local, village or household museums from the "Socio-Economico-Cultural Rebirth of the Romanian Village" conference in previous reports. Latest brief meeting was at Leontina and Zoli's spring 2025.
- 4. Based on Leontina's previous intentions to establish an educational location near her home further discussions are going on about** a location, financing, possible links to other hemp projects and people. See previous reports. Leontina has decided to stop for the moment Sopronul Cultural and the building of the dome until the environment becomes more friendly to her projects. See previous updates. Pamantul Stramosesc has been dissolved as a formal association in 2025. July 27, 2025 there was a spontaneous meeting with a well known herbalist and shared meal with open discussion at Loredana's house.

5. **SuonAngelMiriam are continuing our interaction with Katharina documenting** how to manage and implement new and better ways of herb growing, drying, processing, soil regeneration, distilling, etc.
6. **SuonAngelMiriam are interacting with Virginia on her Bio-Resonance and Herbal and Aromatherapy courses, consultations** and treatments along with the consideration of the SAM2013 Synthesis Tri-Level Color Set as liquids. See previous reports. The first production of Virginia's Favisan samples of the SAM2013 Synthesis Tri-Level Color System have been made and are being tested for many characteristics. **The set tested well enough to use for color consultations.** The consultations are continuing. Please let us know if you are interested.
7. **SuonAngelMiriam are working with Remus and others on updating and expanding** one of his personal spirituality courses on Self Esteem as an Esoteric Group project. Anyone interested in knowing more or helping in this group project please let us know. Updated in October 2023. **Remus passed in May 2025** however, he is still being considered as part of the group and the project at present is continuing.
8. **SuonAngelMiriam are working with Aurellian on how some of the concepts of his book and course** on "The Numerology of the Soul" might relate and correspond to the SAM2013 Synthesis Tri-Level Color System numerology. Both Aurellian and Suon have had direct contact with Yogi Bahjan who taught the numerology of the soul concepts.
9. **SuonAngelMiriam are working with Mircea on ways of distributing SAMfume** and other products and working more closely together on the other projects listed above. Recent meetings held in September Singfest and at the Singureni Christmas Fair 2022 and then in June 2023 also. The last meeting in Bucharest in March, 2024 for a brief update. Phone meetings are on-going.

C. Previous Activities Archive:

1. **Hemp for cooperative research at BioFarmland (BFL) on hold after 3 years of testing.**
2. **2023 Timisoara Cultural Capital office cooperative event named 'SAMatate'.** See FM Sagittarius 2023 for final update on this report.
3. **SuonAngelMiriam have met personally with Georghe Piperea and joined his class action law suit against the constitutionality of mandates. Suit was lost, see previous report details.**
4. **We participated in Remus' course about Stress Management held through ANATECOR** which is related to Virginia's fitotherapy course. We also attended the prayer zoom meeting he and ANATECOR organized for the professor Mircea Stefea who passed in 2023.
5. **Poppy research at BioFarmland (BFL) at Virginia's suggestion.** After three years of starting to self propagate in 2025 the project has been stopped since it would require permits to continue propagation..

D. General Notes and considerations about the group, cycles, meditation and information flow:

1. **We are happy to get to know each other better**, or other ways that we may cooperate either personally, or as organizations. Please let us know if you would like any other meetings or if you have any other comments or questions.
2. **2025 continues the new seven year cycle started in 2020.** The final major group 'impact' has been made in 2019 prior to the next 100 year 'impulse' which happens this year 2025.
3. **It might be considered that these Group Meditations seek** to make use of the spiritual opportunities that the cycles of full moons, solstices and equinoxes, Group Festival Weeks and Centennial Impulse years provide. The unique energies associated with each constellation, season and longer cycles are directed into the consciousness as trans-formative qualities that can lift and expand our hearts and minds.
4. **It might be considered that Group Living tends to the fulfillment of free will in service** and, as this is gradually understood, coming together to co-operate on issues for the benefit of the whole without intentions to dominate, interfere or impose on others. The vision is there, the future is assured, but the key to its successful implementation is that co-operation has to be based on intentions that are based on the good of the whole rather than a focus on self-interest.
5. **In all meditation it is of value for the student to remember that,** from the standpoint of permanent benefit, it is easier to meditate effectively during the period from the new moon to the full moon, than from the full moon to the new moon. The first half of the lunar cycle is one of intensification, absorption and accretion; the second half is one of assimilation and distribution. More real progress over a long period can be made by observing this cyclic law.
6. **Wisely utilizing newly acquired energies keeps in flowing and out flowing channels open** and prevents Sycal (psychical), Astral (emotional), Mental (intellectual) congestion, which may otherwise be experienced, with their accompanying physical consequences.
7. **The following regular monthly cycle is for the group information flow:**
 - a. Full Moon (five days): Two days before, the day of (meditation), and two days after Full Moon for getting impressions.
 - b. The week after the 5 days of the Full Moon: For letting us know or sharing of any impressions during the preceding 5 days. Plus us transcribing our own impressions.

- c. Second week after Full Moon for 'Anchoring' or 'Grounding' impressions through gathering other information or following up on activities based on the impressions. Possible New Moon meditation by those who want and ending that Full Moon Cycle.
- d. Third week after Full Moon (just after the New Moon): Starting to build up to the next Full Moon having any questions to impressions shared and answered and any activities based on impressions started or completed.
- e. Fourth week after the Full Moon (just before the next Full Moon): Coming out with the Keynote and information and timing of the next Full Moon, including the shared impressions or activity from the last Full Moon.
- f.

ADDENDUM 1:

These 'normally' planned next 12 monthly addendum (during this 2025 Astrological year) and this once in 100 year, 'year of higher impulse' will be interrupted for this one month to show the 10 stage hierarchical progressions of the SAM2013 Phases-of-the-Light Crystal Set and how that relates to the Color Consultation, Energy Evaluation, Application and Group consciousness. The normally included addendums for this year on the determining Rays of an individual and how they relate to our Color Consultations will be continued next month to be written and designed to help each person understand and apply their Ray qualities, in their Color Consultations, to the opportunities available at the time of the Full and New Moons for gaining more conscious understanding and then applying that conscious understanding in their daily lives. Hopefully you will enjoy them independent of what changes in consciousness or life they may bring as long as what comes is 'higher and forward' – SAM.

Forward notes by SAM restated from the above Report:

This month we are including the 10 stage hierarchical progressions of the SAM2013 Phases-of-the-Light Crystal Set to show how this relates to and helps explain the hierarchical and progressive nature of our various states of being, consciousness, levels, etc., such as, Sycal (physical/etheric), Astral (emotional), Mental, Somatic (Integrated Personality), Auric (Soul/Karmic/Egoic), Monadic (Spiritual/triadinal).

This will hopefully also help each person see possible ways in which their color readings and hypothetically interpreted Rays may be affecting themselves and their relationships in groups. This will also hopefully help prepare for our work with the new set of Synthesis (Higher SAM Soma Aura Monad) color products being developed by Virginia at Favisan for us. And finally for now this will also hopefully help prepare for our work with the future 'Mergration' (Lower SAM Sycal Astral Mental) color products. Then there will be a complete set of SAM2013 Synthesis And Mergration color products which help show how the 'Mergration' of the Sycal Astral Mental bodies/vehicles/consciousnesses into the Soma or Personality then Synthesizes with the Aura and Monad. Or in reverse the SAM2013 Synthesis And Mergration products would help show how the Synthesis of the Soma Aura Monad bodies/vehicles/consciousnesses then 'precipitates into', determines, influences, governs, or even differentiates, splits or divides into the Mental Astral Sycal bodies/vehicles/consciousnesses from the Soma. From this new simple (although at times complex) and colorful basis of SAM2013 Synthesis And Mergration color system our internal and external relationships and interactions in life, as a living 'organism' verses the mechanistic non-living 'organizational' present views, can be analyzed, discussed, patterns seen, 'paths of least resistance', rhythms and cycles identified and defined, and much more in the realm of conscious understanding and communication. If this information is taken into account also with the hierarchical progressive stages of the Crystal Set information presented here even more understanding should come. More can be found at our website at: <https://www.sam2013.org/colorschoo.html> and <https://www.sam2013.org/crystals.html>.

Examples of a different individual's Ray structures from the books, "Discipleship in the new age (DINA) I & II" by Alice A. Bailey - AAB. This will hopefully help each person see possible ways in which their color readings and hypothetically interpreted Rays may be affecting themselves and their relationships in groups (Free online at: https://www.lucistrust.org/online_books/discipleship_in_the_new_age_vol_i_obooks)

Forward Notes by AAB briefly restated from the previous Report:

We are taught in the esoteric philosophy that seven great divine Emanations, Aeons or Spirits (in Whom we live and move and have our being) came forth from God at the time of the Creation. The same teaching can also be traced in the Holy Bible. Upon one or other of these seven Rays, the souls of all forms of life are to be found as well as the forms themselves. These seven rays produce the seven major psychological types.

These seven rays or emanations are:

1. The first Ray of Will or Power. Many great world rulers are found on this ray, such as Julius Caesar.
2. The second Ray of Love-Wisdom. The Christ and the Buddha are to be found on this ray. It is the great teaching ray.
3. The third Ray of Active Intelligence. The mass of intelligent humanity are found on this ray.
4. The fourth Ray of Harmony through Conflict. Aspirants. Struggling, well-meaning people. Workers for unity emerge along this line.
5. The fifth Ray of Concrete Knowledge or Science. Scientists and people who are purely mental and governed only by the mind.
6. The sixth Ray of Devotion or Idealism. Many Christian people. Fanatics. Numbers of earnest Churchmen of all the world religions.
7. The seventh Ray of Ceremonial Order or Magic. Masons. Financiers. Great businessmen and organizers of all kinds. Executives are found with these energies in their equipment.

However, only when a man is highly developed and nearing the Path of Discipleship is it possible for the esoteric student accurately to surmise what his ray may be. People of all kinds and professions are found on all the rays. **The conflict in a disciple's life is found to lie in the fact that the ray of his soul and the ray of his integrated personality are posed against each other. At the same time, his emotional nature, his mental equipment and his physical brain are also controlled by some one or other of the rays and in this five-fold relationship lies hid much of the problem of the evolving human being.**

Introductory Notes by AAB continued in Cancer 2025 will be skipped this month in Leo and will be continued next month in Virgo.

SAM2013 Phases-of-the-Light Crystal Set Interpretation Notes:

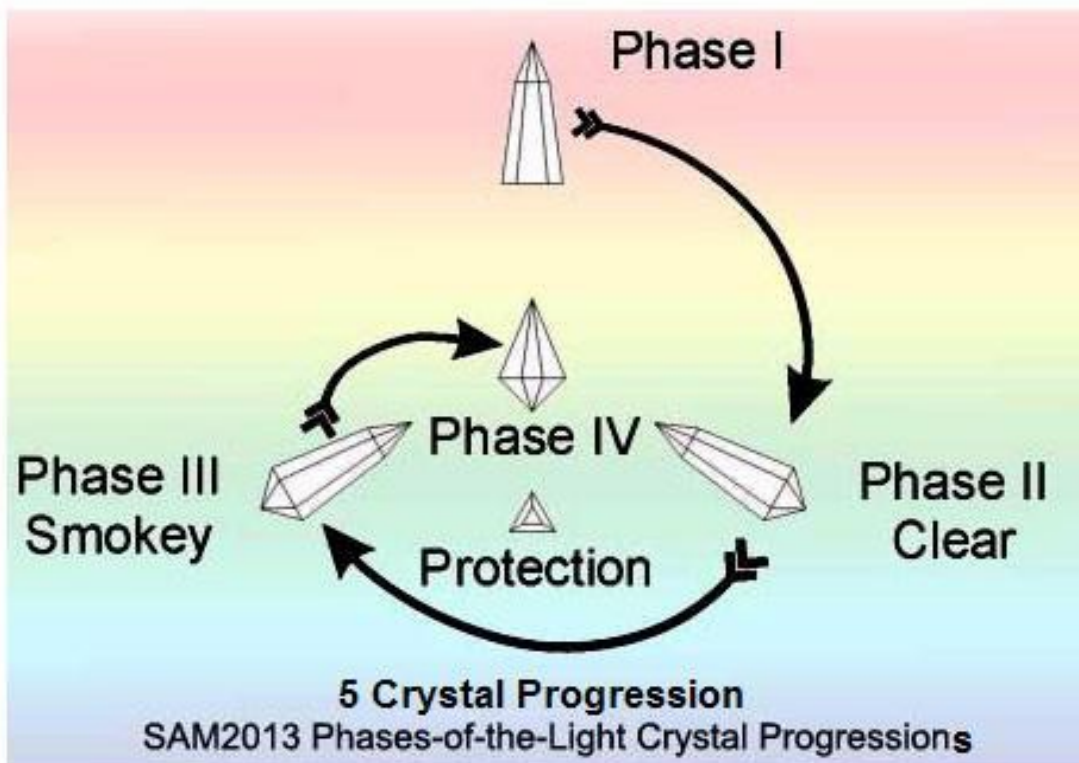

The following three graphics help show and explain the hierarchical and progressive nature of our being or vehicles/bodies and also should help to see the hierarchical and progressive nature of our consciousness from the lowest Sycal (physical/etheric/psychic) to our highest Monadic (Spiritual/Triadinal/Divine/Universal/God) consciousness.

Figure 1: Five Phase Crystal Hierarchical Progression: Is the basic synthesizing hierarchical progression of basically all processes in this universe. There are theories, premises and hypothetical reasons for this, which we will not get into, however, will assume this statement as true (until proven otherwise).

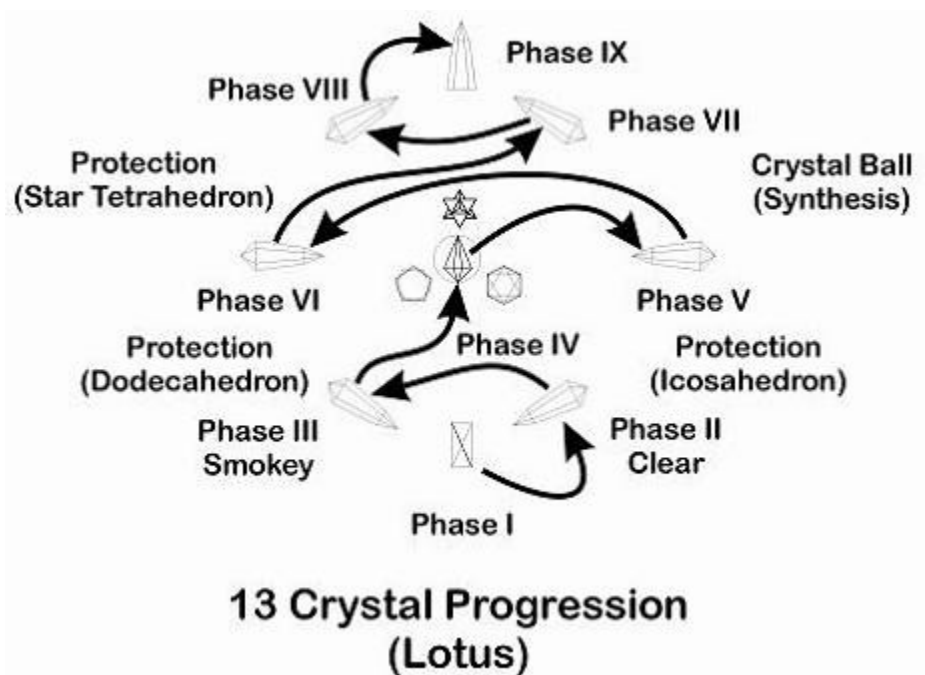

Figure 2: 13 Phase Crystal Hierarchical Progression: Is a more complex synthesizing hierarchical progression of basically all processes in this universe that is basically an extension of Figure 1 from five Phases to 13 Phases. There are theories, premises and hypothetical reasons for this, which we will not get into, however, will assume this statement as true (until proven otherwise). However, for now, let's say that the Figure 1 five Crystal Progression is an extension of 'Oneness' into 'Threeness' and the Figure 2 thirteen Crystal Progression is an extension of 'Threeness' into three threes or 'nineness'.

Figure 3: Full 10 Level/Stage Complete Crystal Set Hierarchical Progression: Is a representation of the complete synthesizing hierarchical progression of all processes on all levels, in all stages including the Figure 1 and Figure 2 Phase hierarchical progressions. There are theories, premises and hypothetical reasons for this, which we will not get into, however, will assume this statement as true (until proven otherwise). However, for now, let's say that the Figure 1 five Crystal Progression is an extension of 'Oneness' into 'Threeness', the Figure 2 Crystal Progression is an extension of 'Threeness' into three threes or 'Nineness', and the Figure 3 Crystal Set is an extension of 'Threeness' and 'Nineness' into nine times three or three times nine into 'Twenty-sevenness' or universality. This can be viewed as a hierarchical progression similar to that of a seed, to a flower, to a fruit.

The way to help learn, follow, make sense, gain revelation from, etc. these Figures 1, 2, and 3 hierarchical progressions is discussed below the Figures:

[Figure 1: Five Phase Crystal Hierarchical Progression \(above\)](#)

[Figure 2: 13 Phase Crystal Hierarchical Progression \(above\)](#)

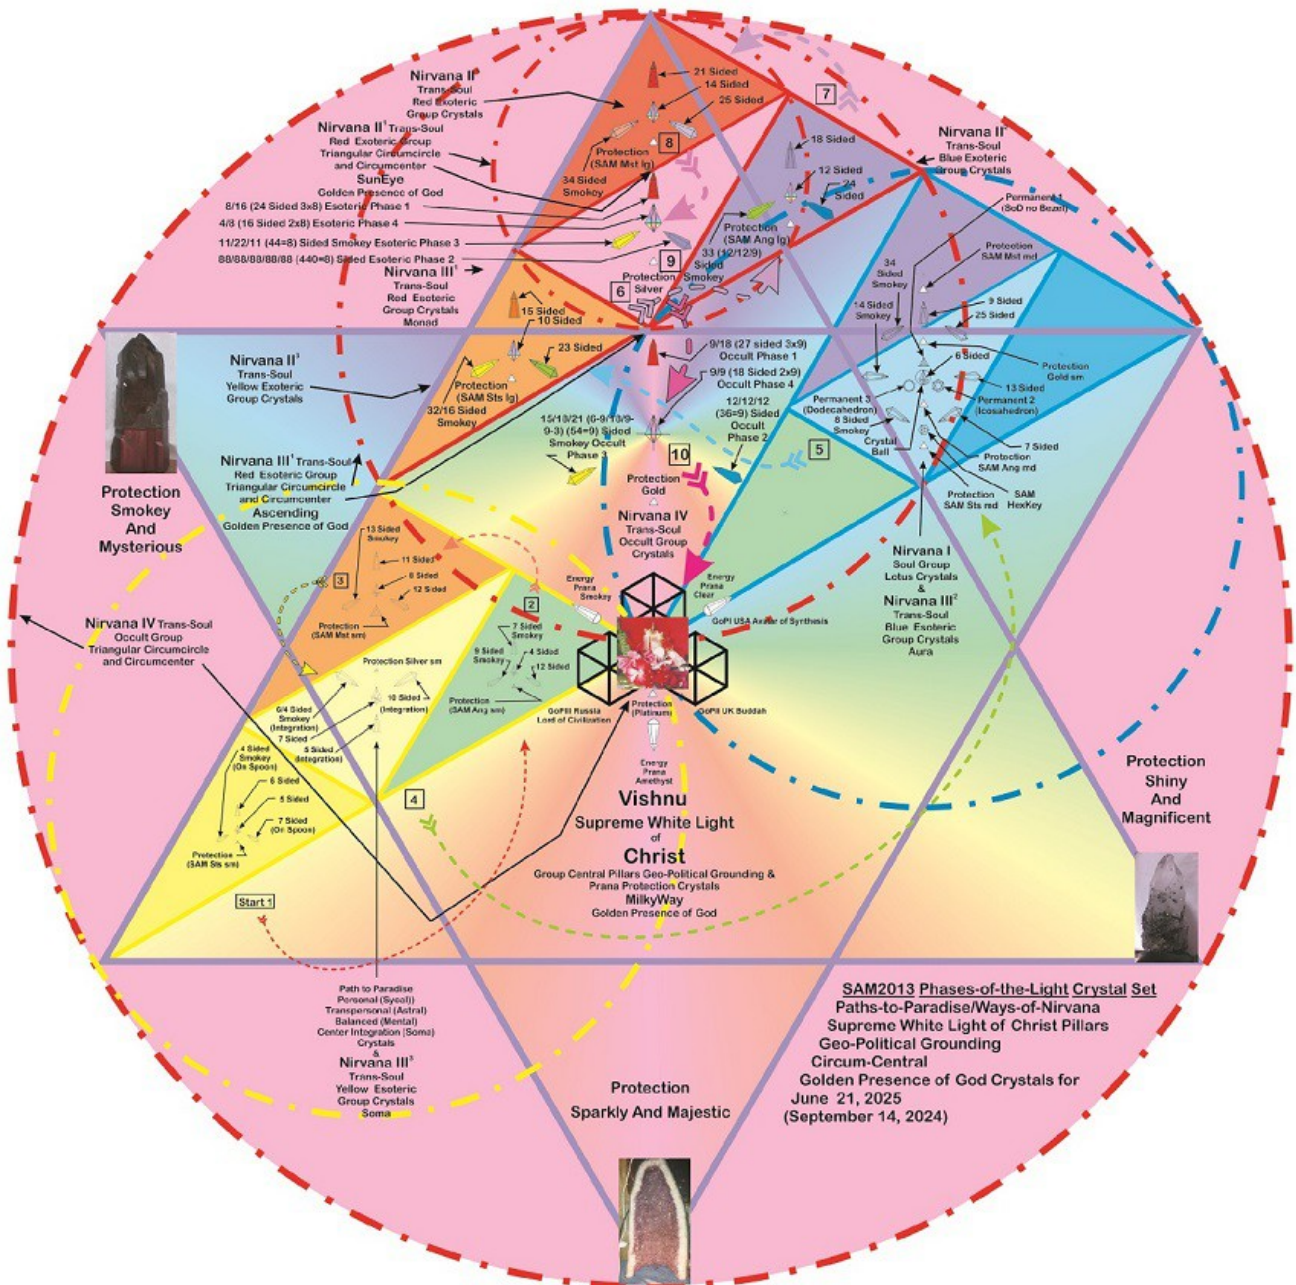

Figure 3: Full 10 Level/Stage Complete Crystal Set Hierarchical Progression (above)

For a 10Mb high resolution image of the above graphic in A0 printable size go to:
<https://www.sam2013.org/images/Circumscribed%20Triangle%20Crystals%209.14.24.1.jpg>

The Hierarchical set now works on ten Levels/Stages (from lowest to highest) as listed below:

1. The Personal, Path-to-Paradise - Sycal level.
2. The Trans-Personal, Path-to-Paradise II – Astral level.
3. The 'Equilibrium/Balanced', Phases-of-the Light - Mental level.
4. The 'Integrated or Mergration', Phases-of-the Light – Soma level.
5. The Group (Soul), Way-of-Nirvana I - Auric level.
6. The Trans(Soul)-Group, Way-of-Nirvana II or three Exoteric Monadic levels.
7. The Trans(Soul)-Group, Way-of-Nirvana III or three Esoteric Monadic levels.
8. The Trans(Soul)-Group, Way-of-Nirvana IV or Occult Monadic level.
9. The Central Pillar Supreme White Light Of Christ three Geo-Political Grounding Crystals levels.
10. The Circum-Central Golden Presence of God three Crystals levels.

Each crystal Phase is determined by the form of the crystal but also is qualified by the number of facets or numerology of the crystal ranging from 3 (numerology 3) to 144 (1 + 4 + 4 = numerology 9):

Phase I Crystals:

Phase I Crystals are cut to orient and assist in cohering and focusing the aspects and attributes of the individual or group "Spirit-ward." They are Directive in their nature and work 'vertically'.

Phase II Crystals:

Phase II Crystals are cut to orient and assist in cohering and focusing the relationship between aspects and attributes of the individual or group toward the Tolerant Light. They are Educative in their nature and work 'horizontally'.

Phase III Crystals:

Phase III Crystals are cut to orient and assist in cohering and focusing the relationship between aspects and attributes of the individual or group toward the Disciplined Light. They are Instructive in their nature and work 'horizontally'.

Phase IV Crystals:

Phase IV Crystals are cut to orient and assist in cohering and focusing the relationship between the lower and higher aspects and attributes of the individual or group. They are Synthesizing in their nature and work 'vertically'.

Phase V Crystals:

In the Nine (not shown) and 13 Crystal Progressions are similar to Phase II Crystals and are cut to orient and assist in cohering and focusing the relationship between aspects and attributes of the soul group toward the Tolerant Light. They are Educative in their nature and work 'horizontally'. In the 5 crystal progressions they are considered Protective in their nature and work 'spherically'.

Phase VI Crystals:

In the Nine (not shown) and 13 Crystal Progressions are similar to Phase III Crystals and are cut to orient and assist in cohering and focusing the relationship between aspects and attributes of the individual or group toward the Higher Disciplined Light. They are Instructive in their nature and work 'horizontally'.

Phase VII Crystals:

In the Nine Crystal Progression (not shown) are similar to Phase I Crystals and are cut to orient and assist in cohering and focusing the aspects and attributes of the soul group "Spirit-ward". In the 13 Crystal Progression they are similar to the Phase II Crystals in cohering and focusing the relationship between aspects and attributes of the soul group toward the Highest Tolerant Light. They are Educative in their nature and work 'horizontally'.

Phase VIII Crystals:

In the 13 Crystal Progression are similar to Phase III Crystals and are cut to orient and assist in cohering and focusing the relationship between aspects and attributes of the soul group toward the Highest Disciplined Light. They are Instructive in their nature and work 'horizontally'.

Phase IX Crystals:

In the 13 Crystal Progression are similar to Phase I Crystals and are cut to orient and assist in cohering and focusing the aspects and attributes of the soul group "Spirit-ward." They are Directive in their nature and work 'vertically'.

Phase X-XII Crystals:

In the 13 Crystal Progression are similar to the Protection Crystals and are cut to orient and assist in protecting the aspects and attributes of the soul group and can also be considered "Protective or Permanent" in their nature and work 'spherically'.

Phase XIII Protection and Synthesis Crystals:

The Protection and Synthesis Crystals are cut to orient and assist in protectively or permanently using and synthesizing, coherent and focused, lower, middle and higher aspects and attributes of the individual or group. In the 13 Crystal Progression are similar to Phase IV Crystals and are cut or shaped (as spheres,

eggs, yin-yang, etc.) to orient and assist in synthesizing the aspects and attributes of the soul group as Spiritual Beingness and are geared towards scrying or seeing things spiritually and work either 'vertically' or 'spherically'.

The place to start and how to progress through the 10 levels:

On Figure 3 magnify the image or go to the high resolution website link and download the high resolution image and view that in another window. Then go the lower left point of the six pointed star at the point labeled 'Start 1'. That is the '**1. The Personal, Path-to-Paradise - Sycal level**' as described above. It is the physical and also includes the brain and our 'physical thoughts' our psyche therefore named in the SAM methodology as 'Sycal' and culminates around age 7. It has a hierarchical progression as shown in Figure 1 and corresponds to the Sycal or physical body/vehicle in the determining Rays of our being under the heading of, '**Examples of a different individual's Ray structures**' in the previous Full Moon Reports this year.

Next, on Figure 3, follow the Red Arrow from the point 'Start 1' up to the number of the next hierarchical progression number 2. That is the '**2. The Trans-Personal, Path-to-Paradise II – Astral level.**' It is the Astral/Emotional and includes what is called the Astral/Emotional/Lower Mind or emotional thoughts and culminates around age 14. It also has a hierarchical progression as shown in Figure 1 and corresponds to the Astral or Emotional body/vehicle in the determining Rays of our being under the heading of, '**Examples of a different individual's Ray structures**' in the previous Full Moon Reports this year.

Next, on Figure 3, follow the Orange Arrow from the point 2 up to the number of the next hierarchical progression number 3. That is the '**3. The 'Equilibrium/Balanced', Phases-of-the Light - Mental level.**' It is the Mental or 'official' lower or concrete mind and culminates around age 21. It also has a hierarchical progression as shown in Figure 1 and corresponds to the mental body/vehicle in the determining Rays of our being under the heading of, '**Examples of a different individual's Ray structures**' in the previous Full Moon Reports this year.

Next, on Figure 3, keep following the arrows. Follow the Yellow Arrow from the point 3 up to the number of the next hierarchical progression number 4. That is the '**4. The 'Integrated or Emigration', Phases-of-the Light – Soma level.**' It is the Soma or 'official' integrated personality that culminates around age 28. It also has a hierarchical progression as shown in Figure 1 and corresponds to the Soma body/vehicle in the determining Rays of our being under the heading of, '**Examples of a different individual's Ray structures**' in the previous Full Moon Reports this year.

Next, on Figure 3, keep following the arrows. This time a big jump. Follow the Green Arrow from the point 4 up to the number of the next hierarchical progression number 5. That is the '**5. The Group (Soul), Way-of-Nirvana I - Auric level.**' It is the Aura or 'official' Soul Body/Level/Vehicle that starts its seven year cycle around age 35 and culminates normally around the age of 42 when our major Karma for this life is worked out. It has a hierarchical progression as shown in Figure 2 and corresponds to the Aura body/vehicle in the determining Rays of our being under the heading of, '**Examples of a different individual's Ray structures**' in the previous Full Moon Reports this year. The three qualities of the Aura are considered as knowledge, love and will, however they must all be learned individually and in relationship to each other. For example we must know knowledge, then we must love knowledge and finally we must will knowledge; likewise we must know love, we must love love and we must will to love; and finally we must know will, we must love will and we must will to will. As can be seen in Figure 3 this Auric body/vehicle/level etc. can be viewed as a higher correspondence of the Soma with it Sycal, Astral and Mental levels and it can also be viewed as a lower correspondence of the '**6. The Trans(Soul)-Group, Way-of-Nirvana II or three Exoteric Monadic levels**' discussed next.

Next, on Figure 3, keep following the arrows. This time another big jump and a three way splitting of levels. Follow the Blue Arrow from the point 5 up to the number of the next hierarchical progression number 5 which links to points 6 and 7 also by following the Indigo and Violet arrows. That is the '**6. The Trans(Soul)-Group, Way-of-Nirvana II or three Exoteric Monadic levels**' It is the Monad or 'official' Spiritual Triad Body/Level/Vehicle that first becomes 'impulsed' normally for the first time around age 54 and finally around age 63 when our major monadic group relationships for this life are worked out. Each of the three has a series of hierarchical progressions as shown in Figure 1 and corresponds to the Monadic

body/vehicle in the determining Rays of our being under the heading of, '**Examples of a different individual's Ray structures**' in the previous Full Moon Reports this year. The three qualities of the Monad are considered as 'Manas' or higher, abstract mind, Buddhi or higher love wisdom and Atma or higher powerful, sacrificial will. As can be seen in Figure 3 this Monadic body/vehicle/level etc. at Stage/Level 7 can be viewed as the highest correspondence of the Soma with its Sycal, Astral and Mental levels and it can also be viewed as a higher correspondence of the Aura with its knowledge, love and will levels. So far we have gone from the lowest of Sycal physicality and thoughts to the highest of Monadic sacrificial power and will consciousness.

Now we will stop going up or down and move more and more to the center, from the circular periphery to the point at the center, or over a 'Cascade of Crescents' which can also be viewed as movement from triangular 'in-circles' or circles that fit 'in' a triangle to triangular 'circum-circles' or circles that fit 'around' and include the whole triangle.

It is all mathematically provable that all of these points of the various centers of triangles lay along a straight line path and there are fancy names for all of these mathematical proofs, but at this point we will trust the complex mathematics that prove this without further elucidation. The point (no pun intended) is that there is a straight line path or way to get from our own individual and group central 'heights' of Christ Auric Consciousness (highest at Stage/Level 7) to the 'center' of universal God Monadic Consciousness. We can travel from the 'Kingdom of Heaven' into the 'Father's House.'

Next, on Figure 3, keep following the arrows. This time a small jump. Follow the light Magenta Arrow to the point 8 down, or moving from the periphery towards the center, to the next hierarchical progression. That is the '**7. The Trans(Soul)-Group, Way-of-Nirvana III or three Esoteric Monadic levels.**' It is, again as in the previous level the Monad or 'official' Spiritual Triad Body/Level/Vehicle that first becomes 'impulsed' normally for the first time around age 54 and finally around age 63 when our major monadic group relationships for this life are worked out. This time it is hypothesized that this esoteric and the next and final group work will normally take from two to seven '**LIFE TIMES**' to identify our group members and have the group complete its part of the work and move on to the more advanced levels of human development, which will NOT be discussed in this Addendum 1. It has a series of hierarchical progressions as shown in Figure 1 and corresponds to the Monadic body/vehicle in the determining Rays of our being and is NOT discussed in the normal Full Moon Report Addendums for this year under the heading of, '**Examples of a different individual's Ray structures**' in the previous Full Moon Reports this year nor will it be in the following Full Moon Reports this year. The three qualities of the Monad again are considered as 'Manas' or higher, abstract mind, Buddhi or higher love wisdom and Atma or higher powerful, sacrificial will and this now in an esoteric or inner (in that it works with inner forces) way of group work.

Next, on Figure 3, keep following the arrows. This time another small jump. Follow the lighter Magenta Arrow to the point 9 down, moving from the periphery even more towards the center, to the next hierarchical progression. That is the '**8. The Trans(Soul)-Group, Way-of-Nirvana IV or Occult Monadic level.**' It is, again as in the previous level the Monad or 'official' Spiritual Triad Body/Level/Vehicle that first becomes 'impulsed' normally for the first time around age 54 and finally around age 63 when our major monadic group relationships for this life are worked out. This time again it is hypothesized that this occult work will normally take from two to seven '**LIFE TIMES**' to identify our group members and have the group complete its part of the work and move on to the more advanced levels of human development, which will NOT be discussed in this Addendum 1. It has a series of hierarchical progressions as shown in Figure 1 and corresponds to the Monadic body/vehicle in the determining Rays of our being and is NOT discussed in the normal Full Moon Report Addendums for this year under the heading of, '**Examples of a different individual's Ray structures**' in the previous Full Moon Reports this year nor will it be in the following Full Moon Reports this year. The three qualities of the Monad again are considered as 'Manas' or higher, abstract mind, Buddhi or higher love wisdom and Atma or higher powerful, sacrificial will and this now in an occult or hidden (hidden in that it works with hidden energies) way of group work.

Next, on Figure 3, keep following the arrows. This time another small jump. Follow the lighter brighter Magenta Arrow to the point 10 down, moving from the periphery to 'around' the center, to the next hierarchical progression. That is the '**9. The Central Pillar Supreme White Light Of Christ three Geo-Political Grounding Crystals levels.**' It is, again as in the previous level the Monad or 'official' Spiritual Triad Body/Level/Vehicle that first becomes 'impulsed' normally for the first time around age 54 and finally around age 63 when our major monadic group relationships for this life are worked out. This time again it is hypothesized that this occult work will normally take from two to seven '**LIFE TIMES**' to identify our group members and have the group complete its part of the work and move on to the more advanced levels of human development, which will NOT be discussed in this Addendum 1. It has a series of hierarchical progressions as shown in Figure 1 and corresponds to the Monadic body/vehicle in the determining Rays of our being and is NOT discussed in the normal Full Moon Report Addendums for this year under the heading of, '**Examples of a different individual's Ray structures**' in the previous Full Moon Reports this year nor will it be in the following Full Moon Reports this year. The three qualities of the Monad again are considered as 'Manas' or higher, abstract mind, Buddhi or higher love wisdom and Atma or higher powerful, sacrificial will and this now in an Geo-Political or Global way as they relate to humanity itself group work. It is hypothesized that the energies of three beings identified as the Lord of Civilization, the Buddah and the Avatar of Synthesis are coming to help assist humanity bring in a new 'organismal' structure (structure for humanity as a living being) of Geo-politics or what is also called ceremonial order. This is a hypothetical key as to how and why understanding these hierarchical progressions is so important to understanding what is happening not only from the lowest to the highest levels but from the most 'outer' periphery to the 'inner' most center of all current consciousness movement for humanity.

Next, on Figure 3, we are now going from 'around' the center 'to' the center so no jumping and no arrows to follow. The center as the next hierarchical progression is the '**10. The Circum-Central Golden Presence of God three Crystals levels.**' It is, again as in the previous level the Monad or 'official' Spiritual Triad Body/Level/Vehicle that first becomes 'impulsed' normally for the first time around age 54 and finally around age 63 when our major monadic group relationships for this life are worked out. This time again it is hypothesized that this occult work will normally take from two to seven '**LIFE TIMES**' to identify our group members and have the group complete its part of the work and move on to the more advanced levels of human development, which will NOT be discussed in this Addendum 1. It has a series of hierarchical progressions on a straight line from the periphery to the center. It corresponds to the Monadic body/vehicle in the determining Rays of our being and is NOT discussed in the normal Full Moon Report Addendums for this year under the heading of, '**Examples of a different individual's Ray structures**' in the previous Full Moon Reports this year nor will it be in the following Full Moon Reports this year. The three qualities of the Monad again are considered as 'Manas' or higher, abstract mind, Buddhi or higher love wisdom and Atma or higher powerful, sacrificial will and this now in a universal/systemic/all encompassing/divine/etc. way as they relate to the universe itself as an evolving being. It is hypothesized that the energies of three progressive stages of universal God consciousness, as beings, can be identified as the Golden Presence of God, behind which gleams the Awful Radiance of God which shrouds the One and Only God. This is another hypothetical key as to how and why understanding these hierarchical progressions is so important to understanding what is happening not only from the lowest to the highest levels but from the most 'outer' periphery to the 'inner' most center of all current consciousness movement and not only for humanity but in the universe as a whole.

This 'Path' with its 10 stages/level and each stage's 5 or 13 phases can be viewed as either very long or as each stage being a repetition/correspondence/transference of the previous stage but on a higher level.

The addition of these hierarchical progressions of crystal forms and numerology (mainly from the numerology of the number of facets on each crystal form) to the SAM2013 Synthesis And Mergration colors and numerology hopefully will bring even greater insights, intuitions, clarity, etc. to the work of providing new and relevant methods, processes, techniques for advancing ourselves and also group consciousness and bringing that consciousness into living 'organismal' form.

Not all of the subtleties of the Crystal Set are discussed here and if anyone sees what they consider 'inconsistencies' or has questions or comments please let us know.

SAM FINAL COMMENT NOTE ON ADDENDUM 1:

Hopefully everyone can see and focus on the Divine beauty, harmony, dance and game (Lila), symphony, intelligence, glory, universality, mystery, science, order, evolution, progressions, hierarchies, etc. in these concepts, hypothesizes, theories, realities, teachings, techniques, methods, insights, impressions, intuitions, thoughts, 'Kama-manas' (emotional thought forms), sensations, kingdoms, realms, etc. and increase their usefulness in our lives and increase the usefulness of our lives.

Conclusion (at this point) on ADDENDUM 1:

May we consider together entering into that higher state of (group/soul) 'bewilderment', especially at this cycle of Aquarian consciousness, yet strength and unity from our lower state of personal certitude and isolation to possibly obtain a universal group consciousness.
