

## Full Moon of Libra on Monday, October 14, 2019 at 00:06:46 in Romania:

The main Keynote or phrase to consider for all Libra Full Moons (each year): **“I choose the way which leads between the two great lines of force.”** Consider the Keynote at, or as close to, the time of the Full Moon as possible and what it might mean as a Group.

### A. Notes on this coming Full Moon of October/Libra:

1. **Watch for any impressions** that may come to you before the Full Moon that may relate to the Keynote (especially the two days before the Full Moon, the day of the Full Moon and the two days after the Full Moon). **If you want to share** any of your impressions with us please do. If you want any impressions shared with the group let us know and we will include them in the next month's meditation notes.
2. **This is the Seventh Full Moon of the Astrological year and is the Fourth ‘Distributing Consciousness and Energy’ full moon of the year.** The energy which was built during the first three ‘Building’ Full Moons at the beginning of the astrological year, which is also called the ‘higher interlude’, is now being distributed over these remaining Full Moons of the astrological year, which is also called the ‘lower interlude’.
3. **On this coming Full Moon there will only be 70 days** until the Winter Solstice and the start of the Festival Group Meditation Week. Next month we will start providing some Festival Meditation Guidelines.

### B. Notes and Activities on or since the last Full Moon September/Virgo:

1. **Surya and Angel meditated at the time of the full moon.** The new Geopolitical Central Supporting Pillar Crystal, that we have given a name of “Simply Altruistic Magnificence,” arrived some days prior to the Full Moon. Just prior to the Full Moon meditation we (SuryaAngel) did a gentle and short attunement with the new crystal. We both had immediate and significant experiences as soon as we touched the bronze base stand for the crystal. These crystal attunement experiences and our meditation experiences are shared in Attachment 1 at the end of this paper.
2. **The 2 hectare of hemp** for cooperative research between Leontina, Virginia, Katharina & Christian and SuryaAngel at BioFarmland (BFL) this year has been harvested using a grain harvester and has produced approximately 100 Kg of hemp seeds. The project is being considered a successful test and possibly to be continued next year. Plant samples are at Favisan awaiting analysis.
3. **Surya, Angel are talking with 2021 Timisoara Culteral Capital office about a cooperative event possibly named ‘SAMatate’** between Favisan, BFL/SolarCity (The Natural Way Assoc. - TNWA), the Hemp Museum, SAM2013 and possibly Anatoacor and Aurellian’s or other groups for the Cultural Capital celebrations in 2021. We are organizing information, with the help of a TNWA board member who is familiar with applying for and receiving European funds and also La Pas festival group, Asociatia Cries, for submitting the application by the end of the year.
4. **The ‘Group Central Pillar Crystal’** has arrived for the Festival Group Meditations December 21 – 28, 2019 and is being gently attuned to during the Full Moon Meditations prior to the Group Festival Week.
5. **We met with Virginia, Katharina and Christian, her brother, about poppy research at BioFarmland (BFL) at Virginia’s suggestion.** Favisan and possibly BFL has product interest and Favisan has specialized research facilities with additional time to test these plants. The plot at BFL was chosen and seeds were purchased from a local grower. The maximum non-regulated amount of poppies was planted but did not grow this year probably due to late planting and unfavorable weather conditions this year. We will consider this again next year.

### C. General Notes and considerations about the group and group cycle and schedule:

1. **We are happy to get to know each other better**, to talk more about these meditations, or other ways that we may cooperate either personally, or as organizations. Please let us know if you would like any other meetings or if you have any other comments or questions as we move into this group formation year.
2. **We are ending a seven year cycle this year** and are now astrologically seven months into a Festival year (Festival celebrated from December 21 – 28, 2019). This will be the start of a new seven year cycle and are looking forward to what this will bring to us and the group at the end of this year.

3. **It might be considered that these Group Meditations seek** to make use of the spiritual opportunities that the cycle of full moons (solstices and equinoxes) provide. The unique energies associated with each constellation are directed into the consciousness as transformative qualities that can lift and expand our hearts and minds.
4. **It might be considered that Group Living tends to the fulfillment of free will in service** and, as this is gradually understood, coming together to co-operate on issues for the benefit of the whole without intentions to dominate, interfere or impose on others. The vision is there, the future is assured, but the key to its successful implementation is that co-operation has to be based on intentions that are based on the good of the whole rather than a focus on self-interest.
5. **The following regular monthly cycle is for the group information flow:**
  - a. Full Moon (five days): Two days before, the day of (meditation), and two days after Full Moon for getting impressions.
  - b. The week after the 5 days of the Full Moon: For letting us know or sharing of any impressions during the preceding 5 days. Plus us transcribing our own impressions.
  - c. Second week after Full Moon for 'Anchoring' or 'Grounding' impressions through gathering other information or following up on activities based on the impressions. Possible New Moon meditation by those who want and ending that Full Moon Cycle.
  - d. Third week after Full Moon (just after the New Moon): Starting to build up to the next Full Moon having any questions to impressions shared and answered and any activities based on impressions started or completed.
  - e. Fourth week after the Full Moon (just before the next Full Moon): Coming out with the Keynote and information and timing of the next Full Moon, including the shared impressions or activity from the last Full Moon.

## **Attachment 1: Simply Altruistic Magnificence Crystal Attunement and Full Moon Virgo Meditation sharing SuryaAngel September 14, 2019:**

### **1. Angel:**

#### **a. Simply Altruistic Magnificence Crystal (GeoP1) Attunement:**

##### **1. Crystal Attunement Background:**

As a background to this specific crystal, I do not remember having a specific insight about it prior to Surya mentioning it, but I have had different impressions about the set of crystals that we use for the group from the first moment I met Surya. At our first ever meditation together, I felt a presence, that I associated with Marcel Vogel, that came and described in very fine detail a stand for the center 4<sup>th</sup> Phase crystal of each of the groups of crystals. We are currently still working at it even after 5 years. Than a few years ago, I had the impression that another big size crystal needs to be added to the entire set of 50 crystals, so then we added my big Amethyst to the group. As Surya started presenting his impressions about the GeoP1 crystal, I started understanding its necessity. I had different energetic experiences just by looking at the pictures of the GeoP1 before it was finished and during its creation process. When it was finished I had a dream about it, that the date of 09.09.19 was significant and the crystal did arrive a little bit before that date. Before it arrived though, as I was looking at the picture of it and wondering what its name might be, I heard the "Simply Altruistic Magnificence" name, as a symbol that altruism is simple and that in being of service and ego-less there is a magnificence that comes.

##### **2. Crystal Attunement Sharing:**

As soon as I touched the stand on the crystal I felt a very strong connection. It was like the magnetic ringing effect of crystals. As it was getting closer to the stand, I could feel my hand vibrating and getting magnetically pulled closer and closer and then when it touched it, it was as if stuck to it. I started breathing, started to welcome the crystal and to try and contact it. As I was doing it, I was seeing as an extension of myself, and remembering that the separation is only in the mind of the son of God, it is not something real. I also stated to the crystal: "I don't know who I am really, where I am, or what I am actually doing" accepting that there are things happening that I don't understand, that I am not in control of, that I am not even aware of. I felt the crystal very strongly asking me: "But why are you here?" As in, why are you here, in a group, meditating with a crystal, attempting a spiritual life. As I was looking deeply inside myself for a true answer to that question, I started to cry. The answer that came from inside, like a plea, like begging, was that I am here because I don't want to feel anger anymore. I don't want to feel it, see it in myself, believe that it is real, I don't want to believe anymore that there is an opposite to what God created, meaning love. I am here because my judgment lead to anger which leads to more judgments, which end in a complete devastating, draining feeling of alone and separation that I do not want to feel anymore because it is not real. I believe I have had enough of at least 30 years of being angry and judgmental and considering myself better than everyone else and I don't want that anymore. It was as if I was having a conversation with the crystal.

##### **b. Virgo 2019 Meditation at time of Full Moon:**

First, as soon as I touched the crystal, it felt like it was fully charged and made the charged squeaky sound without having to do anything, but I was still breathing with it through my mouth and then I

breathed through my nose into the crystal the keynote for the month, and I was thinking about how this relates to being truly loving and truly forgiving in the group, all of these created thoughts that gave me this belief system that there is an opposite to love. As I was breathing I was thinking, "How could the Son of God believe in making an opposite to love" and believe that it is real or that there is such a thing? As I was doing this programming I was feeling deep inside my heart, deep inside myself, forgiving myself, for making or believing that there is an opposite to love. Then as I charged the crystal a lot of energies came and I was going through clouds and then in the clouds there was this door that opened to a beach. So far in the (past) meditations I have been seeing these plain regular beaches with regular water and horizons, but this time there was one of those amazing, awesome places around the world that you see in video clips or pictures of these epic images of green turquoise water with this bright yellow sand and some mountains around the water and bright green tropical trees as in a heavenly, Utopian perfect place.

I stepped in (through the door) I called your name (Surya) three times and you appeared on my right side, you were as bright as the sun but I could see that there was a gap or a hole in this shininess around the ears and eyes more on the right side up also going up onto the back. Then I called my name and everyone else from the group and I saw everybody else and Leontina had a youthful type of energy. Everyone else when I called and they appeared were facing the water, but when I called Leontina she appeared backwards to the water, towards inland, then she kind of jumped around and said like, "Oh, that way". Then I saw us all going together and I placed the crystal on my heart and started getting a lot of energies in my solar plexus and I was still thinking about this forgiveness and anger that is inside me and I got an impression about laying down somewhere for just a couple of minutes with the crystal in like this 'child' pose curled-up and feeling with the crystal a changing from a child to a mother energetically while I'm laying there to keep switching between being a child and a mother to have comfort and to see where it goes.

Then there was this image that was kind of disturbing towards the end of the meditation. I was seeing this image of some men raping a woman. Initially I wanted to push the image away but I said no and then I started wondering why I was seeing this in the meditation. I could see how that is the ego distracting, first of all, but then the satisfaction that it gets out of humiliating others and this distraction that it gets by humiliating and feeling more powerful and better than someone else. That was it and I came out of meditation.

## **2. Surya:**

### **a. Simply Altruistic Magnificence Crystal (GeoP1) Attunement:**

#### **1. Crystal Attunement Background:**

As a background, having this crystal started in 2006 (about 13 years ago) when I met and started working directly with Lawrence Stoller. Lawrence is an internationally recognized crystal cutter who, for some time back in the 1970's and 80's, became an associate and also co-developer with Marcel Vogel of some of the present meditation, healing and other large crystal cutting methods, before going more exclusively into his own work with crystal cutting based on several of the same cutting principles that he and Marcel had developed either individually or cooperatively.

By 2006 I was unable to find uncut rough quartz in the large sizes and low enough prices that I felt were needed for the group work that I and a group would be doing in the future. Also none of the other few Vogel crystal cutters or teachers could find my desired or required quartz nor did they have the cutting equipment large enough to cut the larger crystals. Lawrence was able to supply the quartz in the required sizes and at low enough prices and also was able to cut the larger esoteric group crystals that I felt I needed for the work. He also could find and cut even much larger pieces of quartz; the largest in the world. I didn't even know that I wanted or needed some of these biggest pieces until Lawrence's and his wife's 'home crystal', considered by a channel named Lazarus a 'Shining One Crystal', started drawing these wants and needs out of my heart. By meeting this Shining One Crystal I felt that I had met a being that knew the deeper desires and needs of my heart better than I did.

So, my relationship with Lawrence has grown since that time. First we finished the work we did together to obtain the Esoteric Triangle Group Crystals from 2006 to 2012. Then in 2012 I had a dream and more contact with the Shining One Crystal about my return to Europe with a large clear quartz crystal. That dream simmered for 7 years until last March 2019. Then I made more contact with the Shining One Crystal that led to the present group crystal set expansion including central positional pillar crystal Geopolitical 1. This crystal which represents the fundamental or foundational will of

people has been named Simply Altruistic Magnificence from a dream that Angel had of the crystal and that she shares about in her sharing above.

Lawrence is one of the few people who has been invited into Russia and permitted to purchase electronic grade, museum quality Russian quartz and has a stock for cutting which I had seen in person. I felt very deeply after seeing these uncut pieces of quartz that I would connect some day with one of them. So by last April 2019 through email and pictures Lawrence and Angel and I had agreed to go ahead with sculpting one of the Russian rough quartz crystals to determine if it would be right for the crystal that we were wanting and needing to fill the new central pillar position. Once we saw the finished crystal sculpture by email pictures in last May, 2019 and felt its presence we asked Lawrence to design and make an cast bronze lighted base stand for the crystal. The base was finished in last July 2019 and the crystal was shipped in late last August 2019 and arrived this month in September 2019 in timing with another dream that Angel had about welcoming the crystal into our lives on September 9, 2019. So, on September 9, 2019, a some days after it arrived we welcomed the crystal very gently and allowed it to just be with us until this full moon of Virgo today. Then today just before the full moon meditation we started making our first contact with the crystal as a group and share those experiences in our sections about 'Sharing from the Crystal Attunement'.

## **2. Crystal Attunement Sharing:**

As soon as I touched the metal stand base of the crystal my left hand ring finger was feeling like it was electrically connected to the crystal. For me this felt like and symbolized a loving and heart connection to the crystal and represented a similar connection of each person of the group to the crystal, as a wedding ring represents and is a connection of love of two people similar to my experience of my wedding ring with Angel. Then the connection to the crystal, through the base, also started in my right ear and the connection started drawing out more of a twenty year old very severe illness that I received while doing healing work on another person. The energy then connected over to my left eye and another injury that I had from being hit in that eye twenty-five years ago.

After those connections, representations and healing experiences I was feeling intuitive insight into how group orientated the crystal is and that it should not be used directly by myself or Angel and only for group purposes, such as, full moon or similar group work. Also I intuited that none of this group work with the crystal should start until this coming New Group of World Servers Festival Week from December 21 to 28, 2019. The energies and connections then began to release and I came out of the attunement.

## **b. Virgo 2019 Meditation at time of Full Moon:**

It was a strong meditation. It continued on with things about my ears and eyes, allowing those things to pore out of me into the sheet, like in the Energy Cleansing Process, and into the crystal and into the universe to be released and transformed as they need to go on their way (to their next higher transformation). Then I started going through the last three (FM) keynotes, "I build a lighted house and therein dwell; I am That I am; and I am the mother and I am the child, I God matter am". See all those dualities as one and seeing that there really is nothing else but oneness or the absolute awareness of perfect oneness. Then I just let that awareness go throughout my body through the lower centers and the higher centers uniting as a spiral from the solar plexus up to the heart, back down to the second chakra up to the throat and then down to the first chakra, the base up to the head and that linking through the third eye back down to the spleen. Then the alignment from the personality (Soma), up to the soul (Aura), up to the spirit (Monad), up to the universal triad of God. Then I started linking down to the esoteric triangle (Surya, Virginia, Remus) and then down to the three exoteric triangles allowing the energies of the full moon to flow down through that 'oblique' set of esoteric and exoteric triangles with an understanding that we are the dweller on the threshold and the solar angel, we are both. We recognize each other in each other and yet we are both and neither because we are creations of God. So, it feels like some of that type of work was done, releasing, balancing, strengthening and yet becoming more toward oneness and an awareness of oneness. The crystals still feel good to be working with them with energy being focused and going ahead with them as DK talks about at the time of the full moon even if they are not we become them or the supreme white light of Christ, creation of and extension of God throughout the infinite always of times and space and the SAMs of the higher realms, human hierarchies and lower kingdoms.

**End**
