

Political and Groups Triangle Aspects Simplified

with

Vertical and Horizontal Characteristics

at the

Managerial Level

in a

Side View

Report 5

I. Introduction:

This report is the fifth, so far, in a series of reports that focus on and hopefully help clarify and expand the understanding of the Leadership and 'Positional' Roles and Relationships in Monadic Manifestation Masculine Triangular Groups. Diagram 1 in this document is used as a blueprint, reference, energetic 'flow chart' and for showing correspondences, transferences and transformations, in a word, relationships, from a vertical and horizontal perspective of a 'Side View' within these groups. In our definitions in these reports, "The Top View", is God's view of humans as equals and "A Side View" is a human perspective of how things may help to look hierarchically and progressively as human positions. We do also include at times 'Oblique Views' which is a combination of the God and human view in a 3 dimensional form for help in clarification of the two views and of the hierarchies and progressions and how they relate.

First a few words and brief summary from the previous four reports on 'why' groups and 'how' they relate to spirit, especially now, are so important:

1. We are considering groups and group relationships, as an evolution of personal and couple relationships with spirit, whose time has come according to some hypotheses. Two major hypothetical reasons for this timing are:

A. Humanity has reached a high enough level of evolution and consciousness of ideas and ideals to think, speak and act, or in a single word again, relate, in group conscious ways, such as, family, school, team, company, city, national, regional, continental or even global cooperation and striving for right relationships and goodwill, independent of all of the acknowledged short falls, distortions and perversions of yet almost every present harmfulness, selfishness and fear of loss expressed by many and even the majority many times and even most of the time. In general people are ready, hopeful and looking for the newer and better group methods and are eager and praying for better accomplishment in almost all aspects of daily life.

B. There is a new astrological age of, Aquarius for many people, which some believe carries and brings to our planet a cycle of group consciousness and awareness that is perceivable and influences all life on this planet including humanity. This new consciousness is an individual as forming a part of the body or whole of a group and as a concept each in the group 'serves' the others. This new next cycle of Aquarian 'group consciousness' is considered an awareness beyond, above, better than, or more evolved than that of what is considered the past age of Pisces whose influences are considered more as social, societal, family, national, etc. 'groupings' with a strong leader that influences the individual parts, many times by making an influential initial movement, such as, in schools of fish or flocks of birds, and as a concept 'saves' the others.

2. Therefore, group relationships and particularly Aquarian verses Piscean relationships are

considered more efficient (more lessons given in less time, consuming less time and less effort and more protective) than either personal or couple relationships with spirit at a certain point in our evolution. If spirit can influence a group then the individuals and couples in the group are all influenced simultaneously.

3. Therefore, group relationships are considered more protective, or safe, than either personal or couple relationships with spirit at a certain point in our evolution. If spirit can protect a group then the individuals and couples in the group are all protected simultaneously. The group members will form a check and balance on each other for spirit.

4. There is in general, at a certain point in our evolution, a power in a group over the power of an individual.

5. As a hypothesis, the spiritual life is considered a group life. If we take the words, concepts, ideas used to describe God and Spirit, and really look at what they are saying, the truthfulness of this hypothesis becomes apparent. **Oneness, Love and Light.** These are ways of describing Spirit. See previous reports for more details.

Now looking to these words of Oneness, Love and Light, and moving through the levels from personality to the soul and then to Spirit, could it be not, as a hypothesis, that just as in nature, in our bodies, in every place in physical form where groups naturally occur to form relationships with specific intelligences (look at the way different atoms come together to form molecules with specific structures that create cells and similar cells that come together to create organs, forms that have specific functions, properties, energetic vibrations – intelligence) through specific steps of connecting, communicating, relating, uniting and synthesizing, in Spirit too, there is a specific way in which individuals, consciousnesses have to connect, communicate, relate, unite and synthesize in order to reach the Spiritual God Oneness Love and Light? As a new SAM2013 motto we now include, “Feel Group About Yourself” (along with the other SAM2013 mottoes of, “Feel God About Yourself”, “Feel God About Yourselves”, and “Feel God Above Yourselves”).

SAM2013, and as we believe, life, functions, can be modeled, and explained in triangular relationships. After much meditation, study, ceremony and both personal and physical work with the masculine and feminine geometric and numerological significance of the six pointed star and five pointed star, which equal the eleven of the spiritual Hermaphrodite and clear open channel (6 pointed masculine star + 5 pointed feminine star = 11 spiritual hermaphrodite and clear open channel), a very important piece of trance channeled evocative insight presented itself.

The evocative insight presented and therefore the statements on which this work is based are:

"I Am The Light of the World and I bring forth My Light through My Actions, especially towards Other People.

Let it Shine Forth this New and Exciting Masculinity.

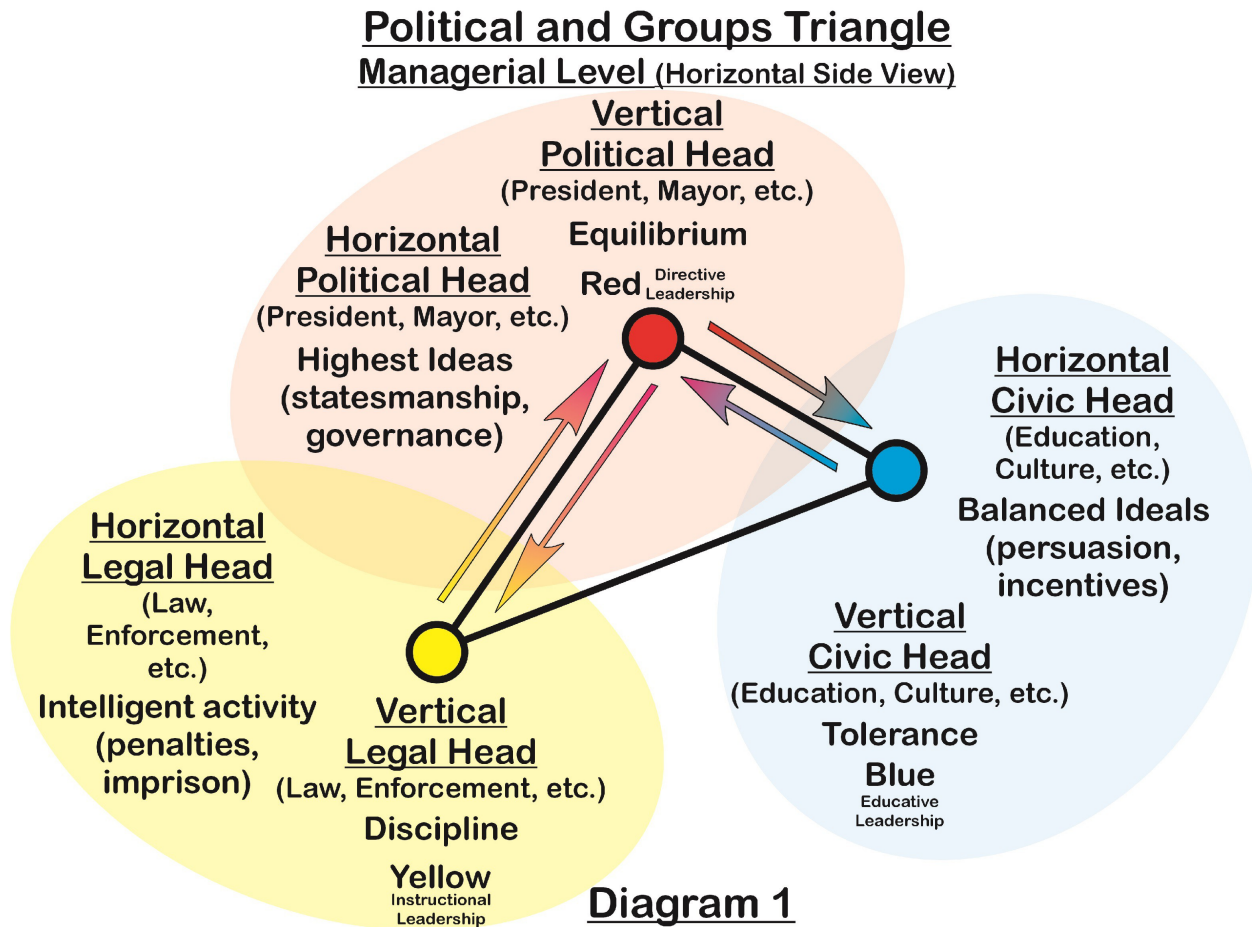

Go out to All People to the Ends of the Earth and Ground the Spirit of Oneness Love and Light both Here and Now for Evermore.

A – men A – men A – men

(Men as a Group Consciousness)."

See previous reports for more details.

Normal cautions to guard against distorting or perverting (which might also be viewed as misunderstandings) universal spiritual principles into unjust personal privileges, or group rules respectively, must be adopted and have also been addressed briefly in previous reports.

II. HOW TO VIEW DIAGRAM 1:

1. Diagram 1 above shows the triangle of Red, Blue, and Yellow dots as simple hypothetical triangular aspect relationships of organisms, in this case political or other groups of people, of a Monadic Manifestation Group.
2. Diagram 1 above shows the energy directions of the relationships between the three triangle positions of the Red, Blue, and Yellow dots. Those energy directions are shown with the dual colored arrows being from the Red Directive position person to the Blue Educative position person and back to the Red Directive position person and from the Red Directive position person to the Yellow Instructive position person and back to the Red Directive position person. Hence the highest Red position is the Directive position or middle equilibrium position 'vertically' between the Blue and Yellow positions, whereas the Blue Educative position person could be viewed as a middle balance position 'horizontally' between the Red and Yellow positions.
3. Diagram 1 above shows the Red, Blue, and Yellow 'spheres', or 'ovals' of vertical and horizontal influence of each of the Red, Blue, and Yellow dots which form a 90°, 60°, 30° triangle with:
 - A. The Red sphere showing the vertical and horizontal aspects of the Red dot and position of the group as:
 - a political head or leadership position of president, mayor, etc., with the vertical aspects of direction, equilibrium, and with the horizontal aspects of the

highest 'ideas' of statesmanship and governance.

- The 'head' of the head or consciousness of the group, or sphere of influence; the highest middle point in alignment with the group 'in center' (center point of a circle which fits within the three sides of the triangle) and 'circum-center' (center point of a circle which passes through the three points of the triangle and fits around the three sides of the triangle).

B. The Blue sphere showing the vertical and horizontal aspects of the Blue dot and position of the group as:

- a civic head position of education, culture, etc., with the vertical aspects of education, tolerance, and with the horizontal aspects of balanced 'ideals' of persuasion and incentives.
- The 'heart' of the head or consciousness of the group, or sphere of influence; the middle right point in alignment with the group 'in center' and only when in a specific equilateral relationship to the Red dot in alignment with the 'circum-center'.

C. The Yellow sphere showing the vertical and horizontal aspects of the Yellow dot and position of the group as:

- a legal head position of law, enforcement, etc., with the vertical aspects of instruction, discipline, and with the horizontal aspects of intelligent 'activities' of penalties and imprison.
- The 'throat' of the head or consciousness of the group, or sphere of influence; the lower left point only in alignment with the group 'in center' and 'circum-center' only when in a specific relationship to the Red and Blue dots.

As a premise and hypotheses the Yellow Dot or position is the older ways or consciousness of relating in a group, the Blue Dot or position is the present ways or consciousness of relating in a group and the Red Dot or position is the new and coming ways or consciousness of relating in a group.

As a short explanation:

1. The more general older ways of discipline, severity, pain and suffering activities to achieve intelligent activity have evolved more into;
2. The more present ways of tolerance, understanding, pleasure, and in some ways of frivolity and of carelessness in some cases of ideals, in a search for a truly wise loving understanding, must now be brought into;
3. The coming future ways of 'equilibrium' based on direction, will and power of 'Spirit' from a higher source of conscious ideas, such as, the oneness of humanity.

For example, the progression from 'good activities' for 'personal good' without consideration for others of the past, has turned into a 'goodwill' towards others as 'good for the soul' of the present ideal, however must now be turned into a 'will to good' for all as an 'idea' in order to bring an equilibrium to the present binary duality of pain or pleasure.

We know that the vast majority prefer pleasure over pain most of the time however, can the higher equilibrium be found and accomplished between the two for all people as an idea or at least a large majority? The Diagram 1 triangle with its vertical and horizontal aspects can give much insight into these premises and questions if thought out, meditated on, spiritually perceived, intuited, understood its symbolic significance or brooded and pondered upon.

III. HOW DO THE TRIANGULARITIES, OF RED, BLUE, AND YELLOW POINTS, GET TO THE PERIPHERY OF SEPARATION AND DIVERSITY AND THEN HOW DO THEY CONVERGE BACK TO THE CENTER OF ONENESS AND IDENTIFICATION WITH ALL? AN HYPOTHESIS (See previous reports for more details):

This, of course, involves the whys, hows, whats, etc. of life. Why are we here, How did we get here to our places in life, what is our purpose, its meaning and our activity, etc.? Am I, or we, or our group in the right place, at the right time, doing the right thing?

1. One way of simply and easily answering these questions is with the answer that, “we are not here since it is all a grand illusion”. We can have faith.
2. Another way of simply, yet not as easily, answering these questions is that we must consider the questions until we can say with certainty “we do not know where we are”, and “we do not know why we are here”, and “we do not know what we are doing”. We may not find out the truth of those questions, however we can have belief.
3. Yet, another way of simply yet even less easily answering these questions is that these are spiritual paradoxes that can only be answered by entering the higher spiritual realms through whatever means, such as, meditation. We can know.
4. And finally, for now, the suggested way that is also simple, yet the most difficult, the most available and according to some people the main way and most certain for success is to apply these questions, concepts, and hypothesis to our own life through all of the interactions we have with all people, in all situations and in all things that happen. We can experiment/accomplish/become.

The truth was said as, “When two or more are gathered, there am I”. However, we are now going from the periphery (the many) back to the One. Therefore, we must start in the many. Out of everyone, start with one, anyone, just pick one. Start with now allowing the Truth to arise or the Truth of the Supreme White Light of Christ to be present. Now pick another person and do the same until you find a person who will also pick you and will also allow the Truth to arise.

Now, the more difficult part, move on to the simplest form of group, a seed group of three people. Why move on? Why make it more difficult? Why not just go one by one? The hypothetical answer is because things have changed. Life has changed.

Can this be? And if so how could this be?

The hypothetical answer is before us in this report. Some answers are:

1. Because the higher masculine Monadic levels have been allowed access directly to humanity and therefore also to individuals.
2. Because the higher masculine positions have become active and that activity affects humanity and therefore also individuals.
3. Because the Vertical Equilibrium must be maintained between tolerance and discipline of a group.
4. Because the Horizontal Balance must be maintained between spiritual concepts and life accomplishments in a group.

5. Because when returning from separation to oneness, two is more separation than three but when going from oneness to separation two is more oneness than three (this should be a very helpful hint). Another hint is to think of it that if you are trying to get everyone into one you are closer to oneness if you get three people together than if you only get two people together - right?

6. So, from Item 5 above, groups on the return to God or Oneness are closer than partners or couples and three is the smallest group. So now in relationships of one group to another or, even better, one group within another, within another (exoteric - outer, esoteric - inner, occult - hidden) we have even further return to God or Oneness or oneness within oneness within oneness. This is shown in detail in Addendum 2, SAM2013 Phases-of-the-Light Full Crystal Grid of July 19, 2023 for June 21, 2025 by the three dashed circles which form two crescents.

The Addendum 2, SAM2013 Phases-of-the-Light Full Crystal Grid of July 19, 2023 for June 21, 2025 shows step by step how the crystals which represent people in group positions integrate (Soma), unite (Aura) and synthesize (Monad) progressively and hierarchically to a culminating point on the periphery and then make an increasing in size series of 'concentric crescent' type of shapes to the center of all through the step-wise movement from inscribed circular centers, representing the Supreme White Light of Christ, to circumscribed circular centers representing the Golden Light Presence of God. In other simpler words we move from our individualized group centers to unite with the Supreme White Light of Christ center and that center then is drawn into the Golden Light Presence of God center until all centers become the center of All.

If you want a high resolution version of Addendum 2 (that can even be printed on A0 size paper) you can download it at:

<https://www.sam2013.org/images/Circumscribed%20Triangle%20Crystals%207.19.23.1.jpg>

Just for reference some of this understanding and information on the awareness of the path of separation and the path of return to Oneness started arising in our awareness and consciousness in the mid 1970s based on our own questioning and is still growing, expanding, deepening, broadening, etc. today almost 50 years later mainly now due to the questioning and cooperation of others.

IV. CONCLUDING REMARKS:

So, please study, ponder, brood on, intuit from and abstractly contemplate Diagram 1 along with the Addendums and text examples for any insights to be gained and share them if you would like.

The hypothetical goal for accomplishment, if there is a goal, and only accomplishment or becoming is to consciously enter into each of these relationships consciously.

The time that this happens most or when the most opportunities are presented are during meditation and especially at the times of the **Full Moons, New Moons, Solstices, Equinoxes**, Seven Day once every Seven Years NGWS (New Group of World Servers) Festivals (the next is **December 21 – 28, 2026**).

The time of meditation is when we rise from the **Soma** as consciously as we can if possible to the **Aura** and then if possible to the **Monad** (even to imagine this can be helpful). Therefore it is the time when all of the possible relationships in this report are hypothetically most possible. It is also

the time when all of the relationships in this report can be misunderstood or distorted or confused.

Please take the time to consider the 'Privilege and Duty' to Spirit, ourselves and others, of meditations being possibly the most opportune time of relating and having relationships on all levels, with all beings, in all kingdoms, however, for most of us, most of the time it will be relating to and having relationships with other people.

Finally a reminder of a few words of caution about how these hypotheses, principles, energy flows, levels or esoteric, occult laws might be viewed by others or ourselves erroneously as distortions or even perversions. Distortions being universal truths that are turned and used for personal gain, betterment, aggrandizement, etc. and perversions being universal truths that are turned and used for criminal personal gain, betterment, aggrandizement, etc.

By using levels to help explain a universal principle that in fact has no levels, which we have discussed in previous reports, on God's vertical view verses our horizontal or oblique views distortions or perversions can appear by considering, making or even demanding that one level is more significant or important than another.

However, a distortion or perversion can quickly arise to consider these levels as denoting greater or lessor importance or reason for creating group laws that distinguish the levels and give certain members certain advantages or disadvantages.

Similar distortions and perversions can happen with the energy flow considerations and other group characteristics that can be helpful to note and use for understanding and betterment yet harmful if used for justification or inequalities or even criminal if used to provide individual privileges, exemptions, etc. respectively.

If we look further into the two main triangular group energy flows between the Directive Leader and Educative Leader and the Directive Leader and the Instructional Leader (as detailed quite fully in the previous three Group Reports) and then if we apply the 3 x 3 matrix of understanding SAM2013 couples relationships of Singles-Stereotypes-Spouses, Ancestors-Archetypes-Ancients, Monogamies-Metatypes-Marriages we have a very useful way of carrying the couple type of unifying energy flow of the triangular groups into a group synthesizing process.

So, we hope these considerations in this report inspire a movement forward to greater understanding, cooperation, and life of relationships, as they move forward from individual and couples types of relationships to group types of relationship, that help, as we started out saying, "Ground the Spirit of Oneness Love and Light." Oneness being related to the monadic, synthetic consciousness, circumcentral golden light of God; Love being related to the auric united consciousness, inscribed supreme white light of Christ; and Light being related to the somatic integrated consciousness of our human individualized Light of intelligence.

V. SUGGESTIONS FOR THE GROUP WORK AS WE MOVE FORWARD TOGETHER:

There is really only one suggestion for the Group Work and that is to use the outlines of these hypothetical relationships to consider what is truly happening to understand these group relationships and then to go into the group service to see how much of the understanding can be realized into actual accomplishments in the actual relationships.

Try to Identify when things get confusing or misunderstood and then with the help of this

information try to 'work it out' into clarity and understanding relationships in the group. Since this would be working on the higher or greater level of the group whatever would be learned and accomplished there would directly be of use on the lower, personal sycal, astral and mental levels with other less group oriented people (since the higher always includes the corresponding lower but the lower only approximates the corresponding higher).

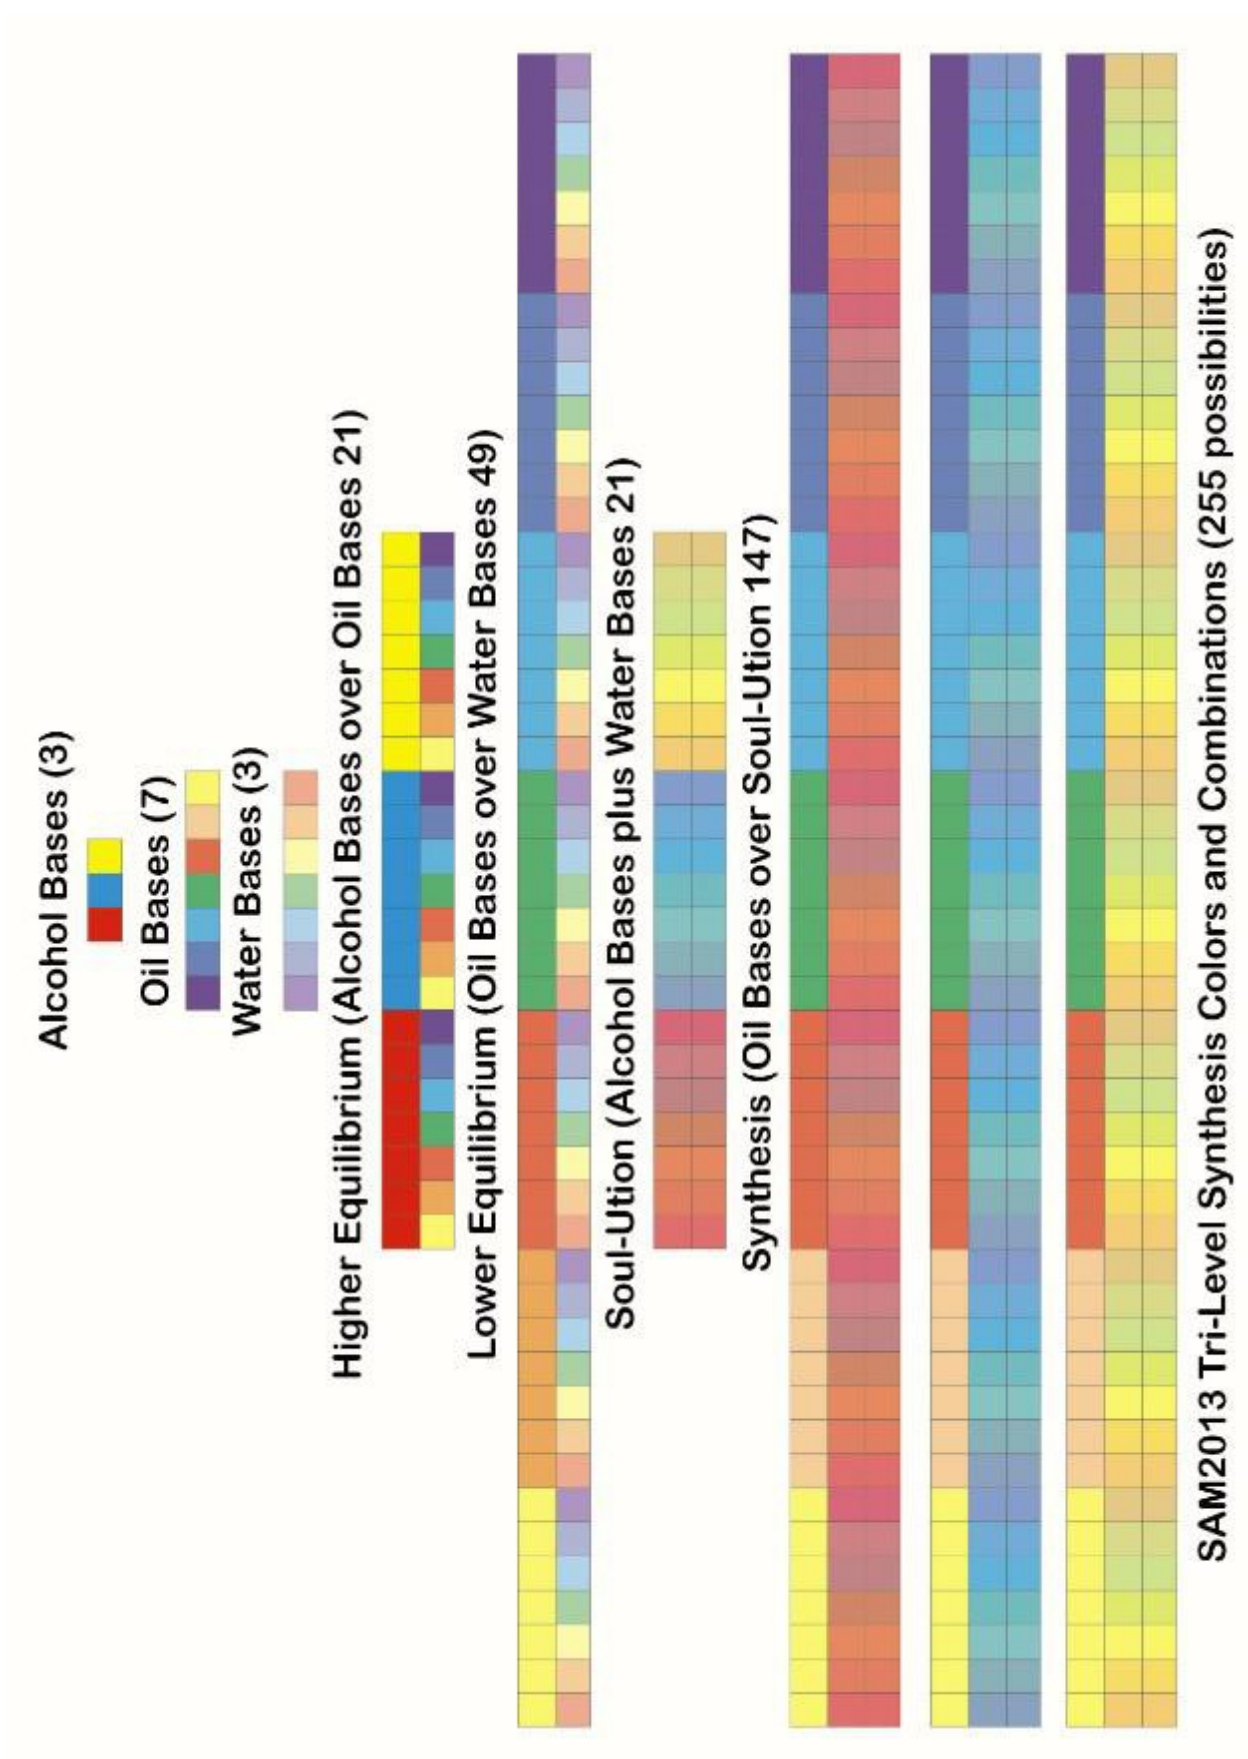

VI. ADDITIONAL ADDENDUM OF THE FULL COLOR SET (ADDENDUMS 1.A. & 1.B.); FULL CRYSTAL SET (ADDENDUM 2); FULL OBLIQUE GROUP (ADDENDUM 3); AND FULL VERTICAL AND HORIZONTAL GROUP (ADDENDUM 4) DIAGRAMS ARE BELOW:

With and In the Spirit of Oneness, Love and Light,

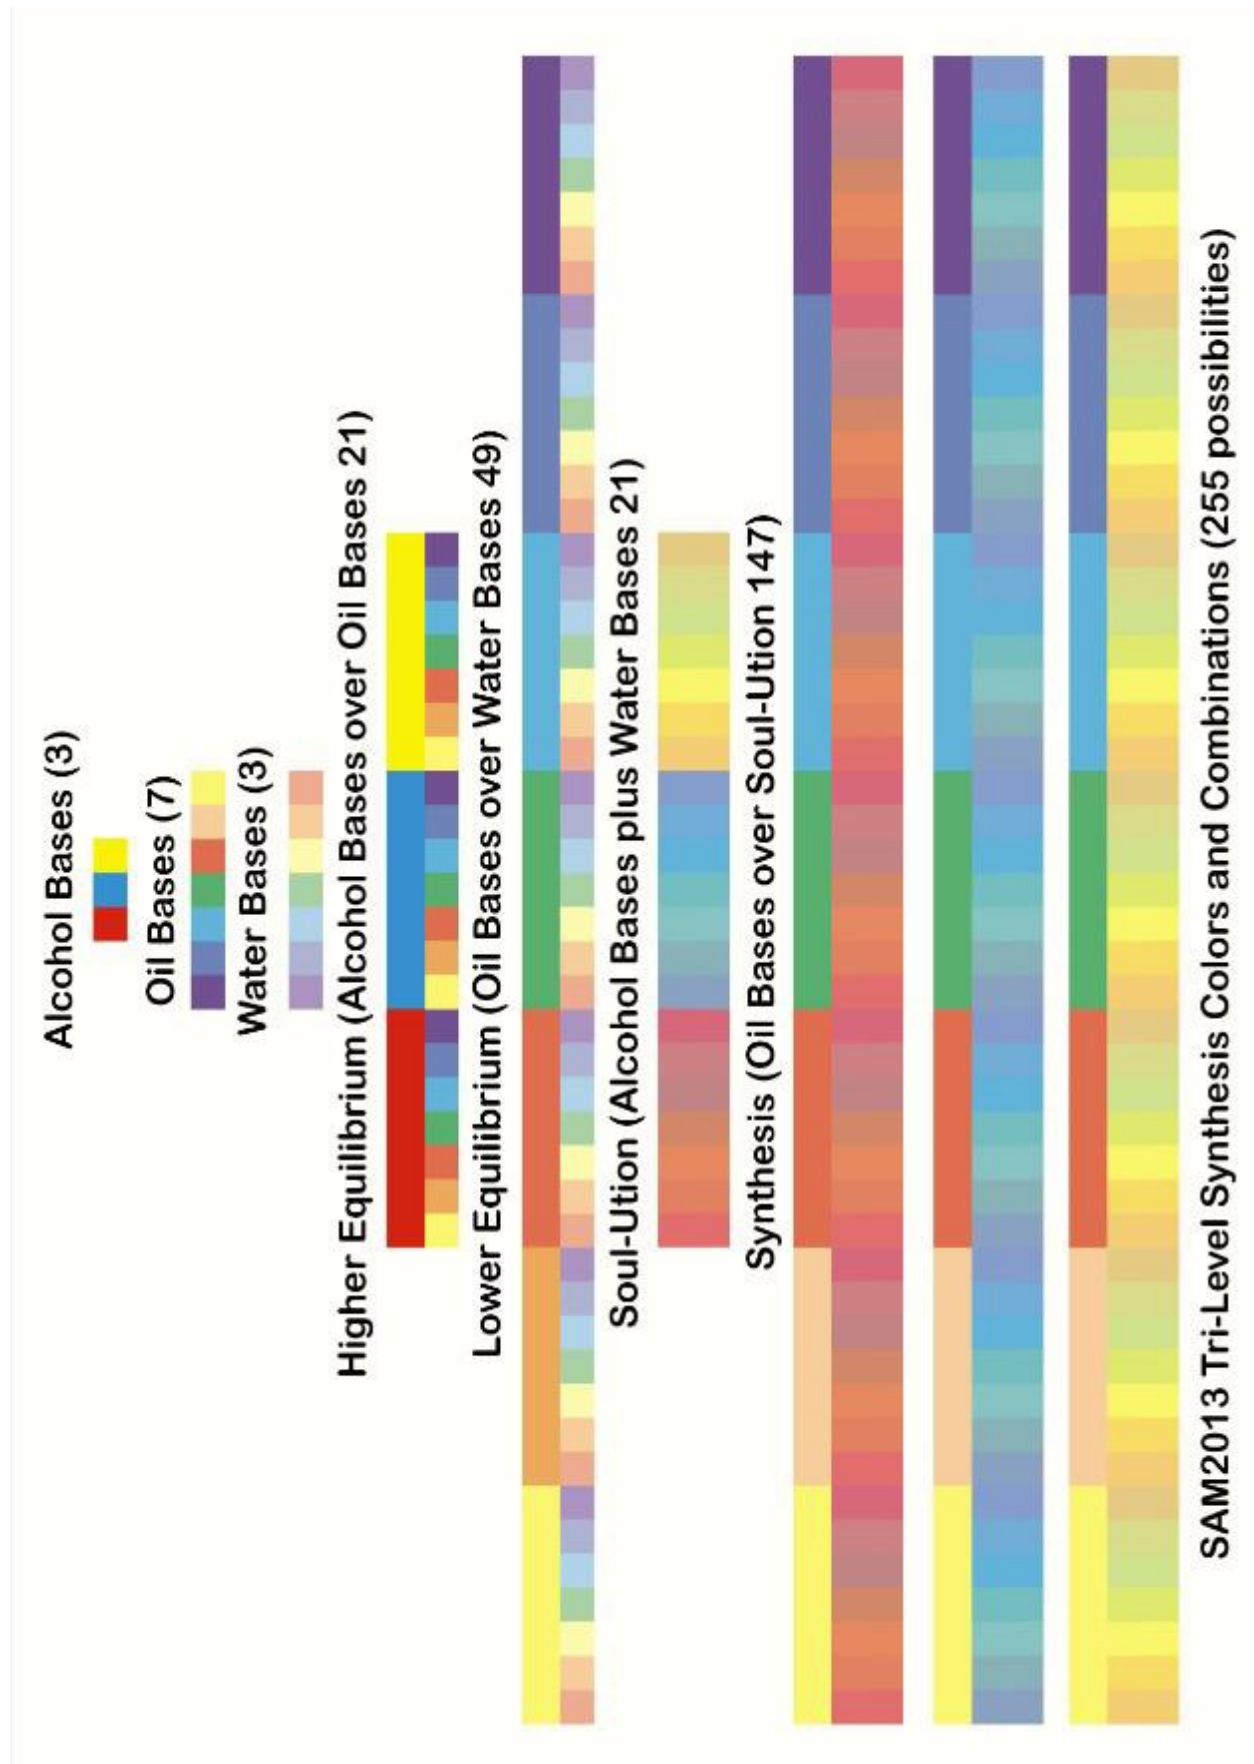

SuonAngelMiriam

Witten March 29, 2026 just before the start of the new astrological year and year of the next Festival Week of the NGWS December 21 – 28, 2026.

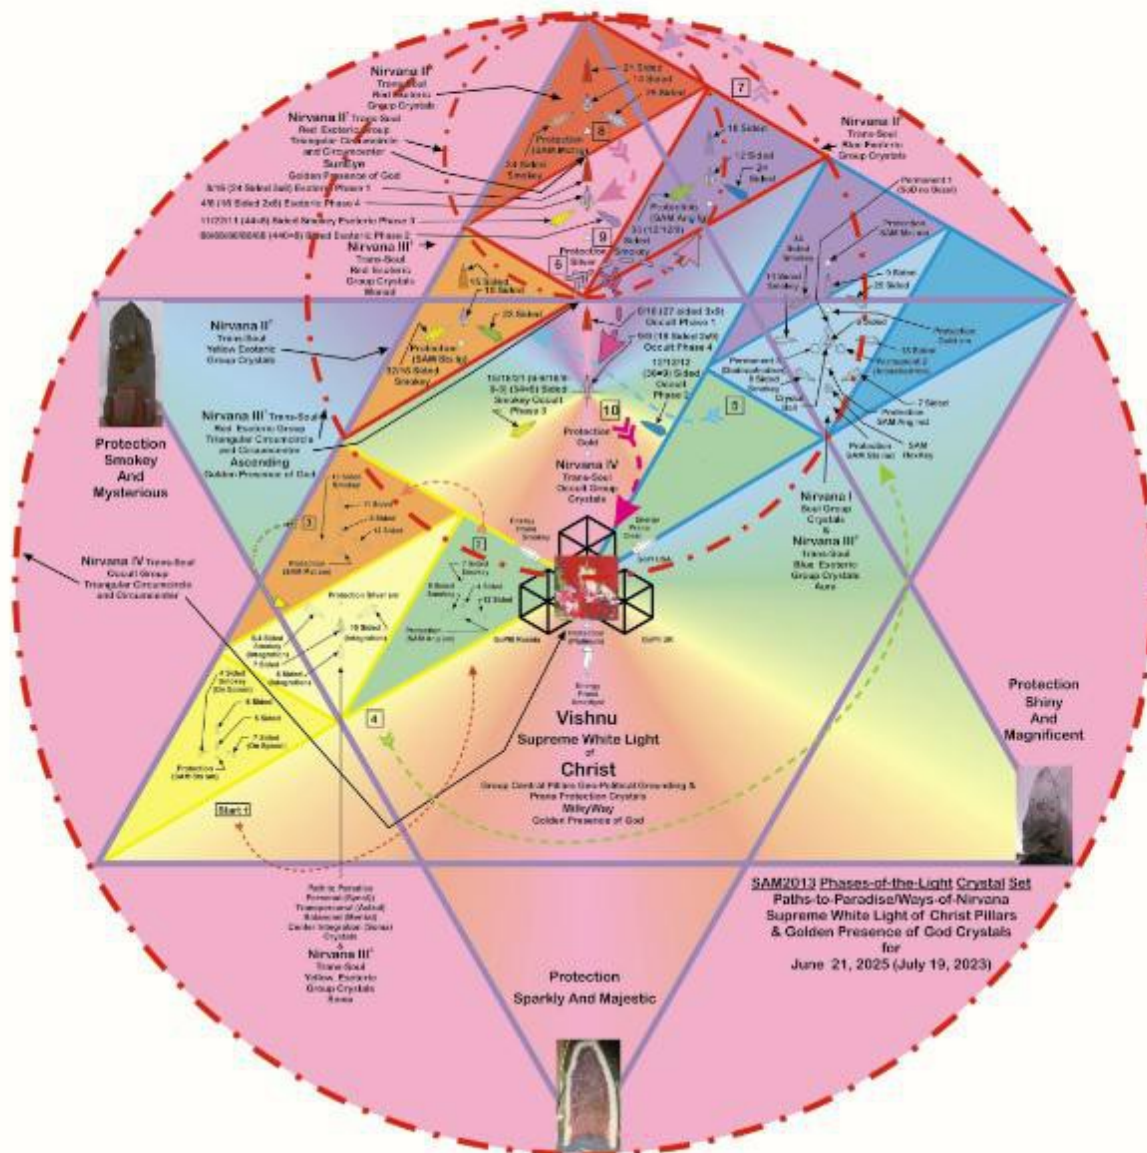

Firiteaz, Romania
